

Education

Bachelor of Computer Science and Engineering CGPA: 3.79/4.00 Honors: Dean's List, Academic Performance Scholarship (2022-23), Undergraduate Research Awards (2024)	<i>The Chinese University of Hong Kong, Shenzhen</i> <i>Anticipated Completion: May 2026</i>
---	---

Experience

Research Assistant CUHK-Shenzhen Human Language Technology Lab	<i>October 2023 – Present</i> <i>Shenzhen, China</i>
- Contributed and collaborated on feature implementation for key projects like Amphion and SingVisio. - Optimized and debugged code to accelerate the development timeline for critical project milestones. - Created a novel celebrity speech dataset, supporting the lab's future speech generation research.	
Summer Intern The Hong Kong Research Institute of Textiles and Apparel (HKRITA)	<i>August 2023</i> <i>Hong Kong SAR, China</i>
- Managed the Enterprise Resource Planning (ERP) system, ensuring operational workflows of 20+ projects. - Led and successfully completed a feasibility study for the company's adoption of a cloud-based service. - Collaborated with Microsoft and key partners to formulate a plan for seamless migration of service, gaining insights into cloud-based system architectures and strategic IT planning.	

Research Projects

SingVisio: Visual Analytics of Diffusion Model for Singing Voice Conversion Article Available at ArXiv.org/pdf/2402.12660.pdf	<i>January - March 2024</i> <i>Shenzhen, China</i>
- Calculated objective criteria of audio data to clearly visualize changes in diffusion model training process. - Designed and analyzed 20+ user surveys from industry experts for system evaluation and further revisions. - Co-authored research paper and produced video demo on SingVisio, effectively promoting project findings.	
Amphion: An Open-Source Audio, Music and Speech Generation Toolkit Article Available at ArXiv.org/pdf/2312.09911.pdf	<i>October - December 2023</i> <i>Shenzhen, China</i>
- Pioneered an evaluation pipeline for text-to-speech models, improving the benchmark efficiency by 30%. - Coordinated the innovation and enhancement of a large-dataset text-to-speech model, enhancing model versatility by realizing multi-speaker functionality.	

Skills

Programming Languages	Proficient in Python (over 4000 lines of code), Competent in Java & C++
DevOps Practice	Skilled in using Git for version control in software development projects
Cloud Architectures	Experienced in developing on public, private, and on-premise clouds
Cloud Platforms	Apt at deploying and managing instances on Amazon AWS & Google Cloud
Cloud Solutions	Familiar with cloud solutions such as Software as a Service (SaaS)
Team Collaboration	Efficient in partnering with cross-functional teams to meet project goals
Versatile	Detail-oriented, agile learner with adaptability in diverse environments
Multilingual	Native Chinese; fluent in English & Japanese, learning Russian & German

Qualifications

Japanese Language Proficiency Test (JLPT) Level N1	Japan Foundation	2023
